the perfect pour

the perfect pour requires three steps, and each one is essential to the beer tasting its best. your bartender first rinses the glass in cold filtered water to ensure the cleanest possible pour. the tap handle is quickly opened to start the flow of beer into the glass, which is held at an angle to allow the beer to flow smoothly and to create the collar or "head" of the beer. the collar is essential to opening up the carbonation and releasing the full flavor experience; it also prevents the beer from coming into contact with the air and losing flavor. the ideal collar is two fingers thick. any excess collar is cleared using the beer wand. your perfect pour is now ready to experience, savor, and enjoy...
